Dear Sirs

**Investigation report following fatal accident on *Maersk Interceptor***

We appointed an investigation team following the serious lifting incident which occurred on *Maersk Interceptor* on 7 December 2017 in order to clarify its scope and the course of events.

Our report is attached.

The report contains findings and a description of identified nonconformities, and we would request an explanation of how these findings and nonconformities will be dealt with.

In connection with our investigation, we issued an order on 3 January 2018. These nonconformities are additional to that order. The latter applied to systems for follow-up and use of portable lifting equipment and to a requirement to identify and review all operations related to the materials handling process for the installation of seawater pumps.

We would request a response to this letter by 31 May 2018. We would also request that this letter and the report be made known to the union officers for the workforce, including the safety delegates.

The report will be published on [www.psa.no](http://www.psa.no).

Yours faithfully

Gunnar Dybvig, by authority  
Supervision coordinator

Sigmund Andreassen  
Principal engineer
