

Norsk olje&gass

Regelverksforum: Standarder og Standardisering

2. September 2015

Øystein Joranger,
Advokat, Norsk olje og gass

Strategy Chart – Norwegian Oil and Gas 2015 - 2017

Ambition 2015 - 2017	The Norwegian oil and gas sector is recognized as the key driver for value creation and innovation - and as an industry that actively addresses the global climate change issues		
Strategic Areas	Strategic Goals		
Climate	1.1. Achieve society's acceptance of gas as part of the solution for tackling climate change	1.2. Support industry's efforts to reduce emissions to air	1.3. Work actively together with the industry on CCS as a measure for tackling climate change
Northern Areas	2.1. Achieve society's support for further oil and gas development in the Northern Areas	2.2. Work for opening of the waters off Lofoten, Vesterålen, Senja and Barents Sea North-East	2.3. Contribute to enhancing educational opportunities and to attract people to the industry
Industry Growth and Cost	3.1. Communicate the value creation and innovation by the industry	3.2. Work for sustainable and competitive wages and salaries in the industry	3.3. Work for competitive and predictable fiscal conditions
Safety and Regulations	4.1. Improve learning and experience transfer to reduce major accident risk	4.2. Achieve cost-effective standards and increased use of international standards	4.3. Work for cost-effective and predictable regulations

Position on Standardisation

Ambition	<ul style="list-style-type: none"> Stimulate competitiveness through standards which help to make the NCS competitive – ie, attractive for investment – and encourage exports by the Norwegian oil supplies industry
Strategic goals	<ol style="list-style-type: none"> Increased use of international standards Contribute to more cost-effective standards
	Key Strategic elements
International standards	<div> <div> <p><u>1. New standards proposed as international standards</u></p> <p>Proposals for new standards should be aimed primarily at the international level.</p> </div> <div> <p><u>2. Industry involvement in the ISO</u></p> <p>Industry involvement is a prerequisite for improving and strengthening international standardisation work.</p> </div> </div>
Cost-effective standards	<div> <div> <p><u>3. Management</u></p> <p>Ensure effective processes and quality assurance of NORSOK standards.</p> </div> <div> <p><u>4. Regulations and cost</u></p> <p>Standards referenced in the regulations must be formulated to avoid unnecessary tightening of the rules or adverse cost increases.</p> </div> <div> <p><u>5. Study – NORSOK standards</u></p> <p>Perform a study on existing NORSOK standards to determine whether these should be withdrawn, maintained unchanged, revised or proposed as international standards.</p> </div> </div>

mellom NORSOK-eierne og
Standard Norge**

Denne dokumentstrukturen er ikke et dokumenthierarki [juridisk],
men en presentasjon av aktuelle dokumenter relevante for petroleumsstandardisering.

Forslag til nye standarder

Ingen forslag til nye NORSOK-standarder kan fremmes
FØR forslaget er blitt fremmet som en internasjonal
standard.

Ambition	<ul style="list-style-type: none"> Stimulate competitiveness through standards which help to make the NCS competitive – ie, attractive for investment – and encourage exports by the Norwegian oil supplies industry 		
Strategic goals	<ol style="list-style-type: none"> Increased use of international standards Contribute to more cost-effective standards 		
	Key Strategic elements		
International standards	<div> <div> 1. New standards proposed as international standards Proposals for new standards should be aimed primarily at the international level. </div> <div> 2. Industry involvement in the ISO Industry involvement is a prerequisite for improving and strengthening international standardisation work. </div> </div>		
Cost-effective standards	<div> <div> 3. Management Ensure effective processes and quality assurance of NORSOK standards. </div> <div> 4. Regulations and cost Standards referenced in the regulations must be formulated to avoid unnecessary tightening of the rules or adverse cost increases. </div> <div> 5. Study – NORSOK standards Perform a study on existing NORSOK standards to determine whether these should be withdrawn, maintained unchanged, revised or proposed as international standards. </div> </div>		

Industrihøringer

Norsk olje og gass har etablert prosesser som sikrer at alle våre medlemselskaper blir involvert i industrihøringer av standarder.

Ambition	<ul style="list-style-type: none">Stimulate competitiveness through standards which help to make the MCS competitive - i.e. attractive for investment - and encourage exports by the Norwegian oil supplies industry		
Strategic goals	<ol style="list-style-type: none">Increased use of international standardsContribute to more cost-effective standards		
Key Strategic elements			
International standards	<div>1. New standards proposed as international standards Proposals for new standards should be aimed primarily at the international level.</div>	<div>2. Industry involvement in the ISO Industry involvement is a prerequisite for improving and strengthening international standardisation work.</div>	
Cost-effective standards	<div>3. Management Ensure effective processes and quality assurance of NOROGK standards.</div>	<div>4. Regulations and cost Standards referenced in the regulations must be formulated to avoid unnecessary tightening of the rules or adverse cost increases.</div>	<div>5. Study - NOROGK standards Perform a study on existing NOROGK standards to determine whether these should be withdrawn, sustained unchanged, revised or proposed as international standards.</div>

Prosjekt: «NORSOK Analyse»

Et samarbeidsprosjekt i regi av NORSOK-eierne.

Samtlige NORSOK-standarder skal vurderes på et overordnet nivå med hensyn til følgende kriterier:

- Kosteffektive standarder
- Konkurranseskraft
- Forsvarlig sikkerhetsnivå
- Internasjonalisering

Arbeidstakermedvirkning og involvering av Ptil blir ivaretatt gjennom prosjektets samarbeid med Sektorstyre Petroleum.
